Frontend Developer with experience building scalable web applications and educational platforms. Progressed from Junior Developer to Lead Frontend Developer, taking ownership of frontend architecture, reusable component systems, and performance optimization. Experienced with Vue.js ecosystem, TypeScript, API integration, and delivering production-ready products.

Experience

Kwork - Freelance projects 12.2024-06.2025

Frontend developer

- Developed and deployed responsive web applications for various clients, consistently meeting project deadlines and technical specifications.
- Managed the full software development lifecycle (SDLC), including requirements analysis, architecture design, implementation, and deployment.
- Communicated directly with stakeholders to translate business requirements into efficient, scalable frontend solutions.
- Optimized website performance and accessibility, resulting in improved user engagement and cross-device compatibility.
- Maintained a high client satisfaction rate through proactive problem-solving, clean coding practices, and reliable post-launch support.

Neurounite Remote

Frontend Engineer

06.2025-01.2026
