SUMMARY

Frontend Engineer with 3+ YoE shipping production Vue and React products end-to-end. Built 5 realtime collaboration modules for cookie.rf (EdTech, 500+ students); sole frontend on a React/TypeScript fashion contract with custom canvas board and AI try-on; delivered AI agent and lead dashboards with REST and Node.js/Express. Strong in Vue 3 / Nuxt and React / Next.js.

WORK EXPERIENCE

Frontend Engineer **04/2026 – Present**
cookie.rf – Collaborative EdTech for programming education Remote

- Owned 5 core student modules in Vue.js + JavaScript: Yjs code editor, runtime console, collaborative board, chat, and video calls.
- Designed and implemented realtime synchronization architecture (Yjs / WebSockets) supporting 200+ concurrent collaborative sessions across desktop and mobile.
- Reduced interaction lag on mid/low-end devices by ~35% through render throttling, lazy module loading, and leaner board state updates for a platform used by 500+ students.

Frontend Engineer (Contract · Sole Frontend) **12/2025 – 04/2026**
Lookformer.ru – Fashion product with AI virtual try-on and style guides (contract project) Remote

- Sole frontend owner: designed and shipped full product UI in React + TypeScript from architecture to production in ~4 months.
- Designed and implemented a custom Canvas API drawing board from scratch (no third-party board libs) with smooth drawing on phones and desktops.
- Decreased JS bundle size by ~28% via code-splitting and asset cleanup; improved Lighthouse Performance from ~72 to ~94 on key flows.
- Shipped AI try-on (photo upload → virtual fitting) and commerce UI for fashion guides.

Frontend Engineer **06/2025 – 01/2026**
Neurounite – AI growth agency (agent + lead-generation products, neurounite.ai) Remote

- Designed and implemented AI agent dashboard and lead search/display pages used daily by sales/growth workflows.
- Integrated REST APIs across 8+ dashboard views; cut lead-table filter/render time by ~40% with virtualization and leaner state.
- Owned Node.js / Express work as needed — shipped new API endpoints and unblocked backend issues while collaborating with backend engineers.

Frontend Developer **12/2024 – Present**
Freelance (Kwork & direct clients) – Multiple client web products Remote

- Delivered 10+ production web apps end-to-end: requirements, architecture, implementation, deploy, and support.
- Shipped client MVP UIs in 1–3 weeks under fixed deadlines; kept post-launch fix turnaround under 24–48 hours for active clients.

SKILLS

Frontend: Vue 3, Nuxt.js, React, Next.js, Tailwind CSS, Canvas API, Realtime Collaboration, Yjs; **Languages:** TypeScript, JavaScript (ES6+), HTML, CSS; Russian (Native), English (B2); **AI:** Cursor IDE, MCP, AI-assisted engineering, AI agent UIs, AI try-on flows; **Backend:** Node.js, Express, REST APIs, WebSockets; **Tools:** Git, CI-aware delivery, performance tuning, accessibility, code review; **Also:** Flutter (Dart), Rust
